## Summary

---

I work at the intersection of customers, technology, and business outcomes. Across customer success, service delivery, solution architecture, and consulting roles, I have helped enterprise organizations adopt complex platforms by aligning people, process, and technology around clear goals and measurable value. I bring hands-on experience driving LLM adoption across teams, building AI-enabled workflows, and translating emerging AI capabilities into practical, responsible solutions that scale. My strength is bringing structure to ambiguity, whether that means building adoption and success plans for complex accounts, recovering at-risk renewals, standing up enablement programs, or partnering with product teams as a voice of the customer.

## Experience

---

### alpONE AG

Baar, Switzerland

*Senior Cybersecurity & Technology Consultant*

*December 2023 - Present*

- Designed and delivered a Power Apps and AI solution for automated supplier cybersecurity questionnaire review, reducing assessor processing time by 40%.
- Designed, built, and commercially validated a GenAI-enabled supplier risk assessment MVP, securing a first customer worth CHF 60K; used Python, Next.js, the OpenAI API, and MongoDB to enable natural-language analysis of third-party risk data for security leaders.
- Compared prompt and model performance across supplier-risk use cases using LLM evals, implemented summarization and explanation workflows, and added output-format validation to improve reliability while balancing quality, cost, and scalability.
- Partnered with enterprise customers to implement AI-driven improvements in GRC workflows, reducing supplier questionnaire review time by 40% and demonstrating a clear path to broader operational scale.
- Led adoption of LLM platforms across a 20-person consulting team, redesigning workflows for research, knowledge creation, and client artefacts, increasing artefact production by 80%.
- Stepped in to provide program leadership for an enterprise customer cybersecurity operations function during a leadership gap, maintaining continuity across strategic initiatives in a complex, multi-team organization of roughly 60 to 70 professionals.

### Nexthink Ltd

London, United Kingdom

*Service Delivery Manager*

*April 2022 - December 2023*

- Led managed service delivery for 4-6 strategic enterprise customers across EMEA, the US, and APAC, driving executive business reviews, roadmap workshops, adoption plans, value-realization programs, and recovery motions across complex global deployments, at-risk accounts, and expansion opportunities.
- Recovered \$3M+ ARR across two at-risk enterprise renewals by rebuilding executive alignment, refocusing adoption on high-value use cases, and correcting value-realization gaps that restored customer confidence and reopened expansion paths.
- Built migration and adoption plans for enterprise customers transitioning to Nexthink Cloud, identifying technical and product gaps that blocked rollout, then partnering with Product Management to prioritize roadmap actions that preserved critical use cases, accelerated migration, and protected long-term customer value.
- Used QBRs and adoption reviews to benchmark realized value against customer goals, identify underutilized capabilities, and align executive, business, and technical stakeholders on optimization and expansion plans across new teams, workflows, and processes.
- Guided enterprise customers in scaling API-enabled integrations and endpoint automations, balancing remote actions, application coverage, and platform limits to maintain performance and end-user experience while surfacing expansion opportunities as environments approached technical thresholds.
- Led the managed service engagement for a global healthcare customer, driving adoption, value realization, and executive alignment that delivered \$2.2M in verified first-year savings, reduced support contacts by 20%, and supported product expansion.
- Partnered with Account Executives and Customer Success teams on seat-based expansion motions, translating adoption outcomes into technical narratives, business cases, and rollout strategies that supported broader organizational deployment and increased contracted footprint.
- Synthesized enterprise customer pain points into an AI-driven support automation concept integrating telemetry, ticket context, and knowledge sources, shaping an internal prototype and serving as a voice of the customer into emerging product direction for AI-assisted diagnostics and remediation.

## Nextthink Ltd

Product Educator

London, United Kingdom

January 2021 - April 2022

- Built and scaled Nextthink's digital learning and enablement platform, designing role-based learning paths and certifying over 3000 end-users after launch, that enabled enterprise teams to adopt and operationalize the platform faster across support, infrastructure, and operations use cases.
- Developed enablement programs for customer champions and end-users, supporting knowledge transfer, broader adoption, and faster time to value across complex enterprise environments.
- Partnered across product, services, and customer-facing teams to turn new capabilities into repeatable rollout and enablement motions, reducing time to value and supporting more durable adoption across customer organizations.

## aplus consulting GmbH

IT Strategy / M&A Consultant

Zurich, Switzerland

September 2019 - September 2020

- Led Day 0 / Day 1 IT target operating model readiness for a critical-infrastructure M&A, coordinating governance across 30+ workstreams spanning security, infrastructure, compliance, and tooling migration while owning executive reporting and escalation.

## Ontrex AG

Solution Architect

Zurich area, Switzerland

April 2018 - September 2019

- Won a CHF 1M+ / 3-year deal by leading technical discovery, a proof of value, and a Solution-based demo that demonstrated a 90% reduction in endpoint compliance assessment effort for a regulated banking customer.
- Architected and delivered secure Nextthink platform deployments for 15+ enterprise customers across finance, healthcare, retail, and public sector environments, covering topology design, SSO, encryption, capacity sizing, production migration, and API-based integrations for environments spanning 5,000 to 50,000+ endpoints.

## Access World (Glencore) AG

IT System Administrator

Zug, Switzerland

August 2017 - March 2018

- Maintained global IT continuity as primary administrator for a hybrid Azure and on-prem environment during a 9-month infrastructure-owner absence, supporting Microsoft Azure workloads across multiple regions.

## Glencore International AG

IT PMO & Client Engineer

Baar, Switzerland

January 2015 - August 2017

## Garaventa AG

IT Support Engineer

Arth-Goldau, Switzerland

January 2014 - December 2014

## Education

---

### Business Information Technology HF (Bachelor-equivalent)

AKAD Technics

Zurich

2020

### Federal Diploma of Vocational Education in Information Technology

GIBZ

Zug

2017

## Skills

---

Languages: German, English, Swiss-German

Customer success: Strategic customer success, success plans & QBRs, executive stakeholder management, value realization, adoption and change management, technical discovery, customer enablement, consumption-based adoption, seat-based expansion

Technologies: Claude Code, Claude Cowork, LangChain, Prompt Engineering, Microsoft CoPilot, REST APIs, Python, PowerShell, JavaScript / TypeScript, Next.js, RAG / vector search, Azure, KQL, SQL Server, SCCM, Nextthink

Domain expertise: Enterprise SaaS, AI solution design, API integration, ITSM, SSO / SAML, TLS / certificates, reverse proxy, DMZ / network segmentation, FINMA, PCI-DSS, ISO / NIST, EU CRA / NIS2, vulnerability management
